# Annual report: the state of the drugs problem in Europe

This is the EMCDDA's flagship publication which presents the latest picture of the drug phenomenon across Europe. Published every autumn, it is essential reading for policymakers, professionals and researchers in the drugs field or indeed anyone seeking the latest findings on drugs in Europe.

## Facts, figures and trends

The report offers a wealth of facts, figures and trends on the drug phenomenon in some 30 countries and demonstrates Europe's achievement in implementing a methodologically sound and comprehensive monitoring system.

Individual chapters dedicated to specific drugs explore the latest developments in supply and availability; prevalence and patterns of use; health effects and interventions. Also detailed in the report are the legal, political, social and health responses to drugs applied across Europe today.

Overview of the drug phenomenon in some 30 European countries

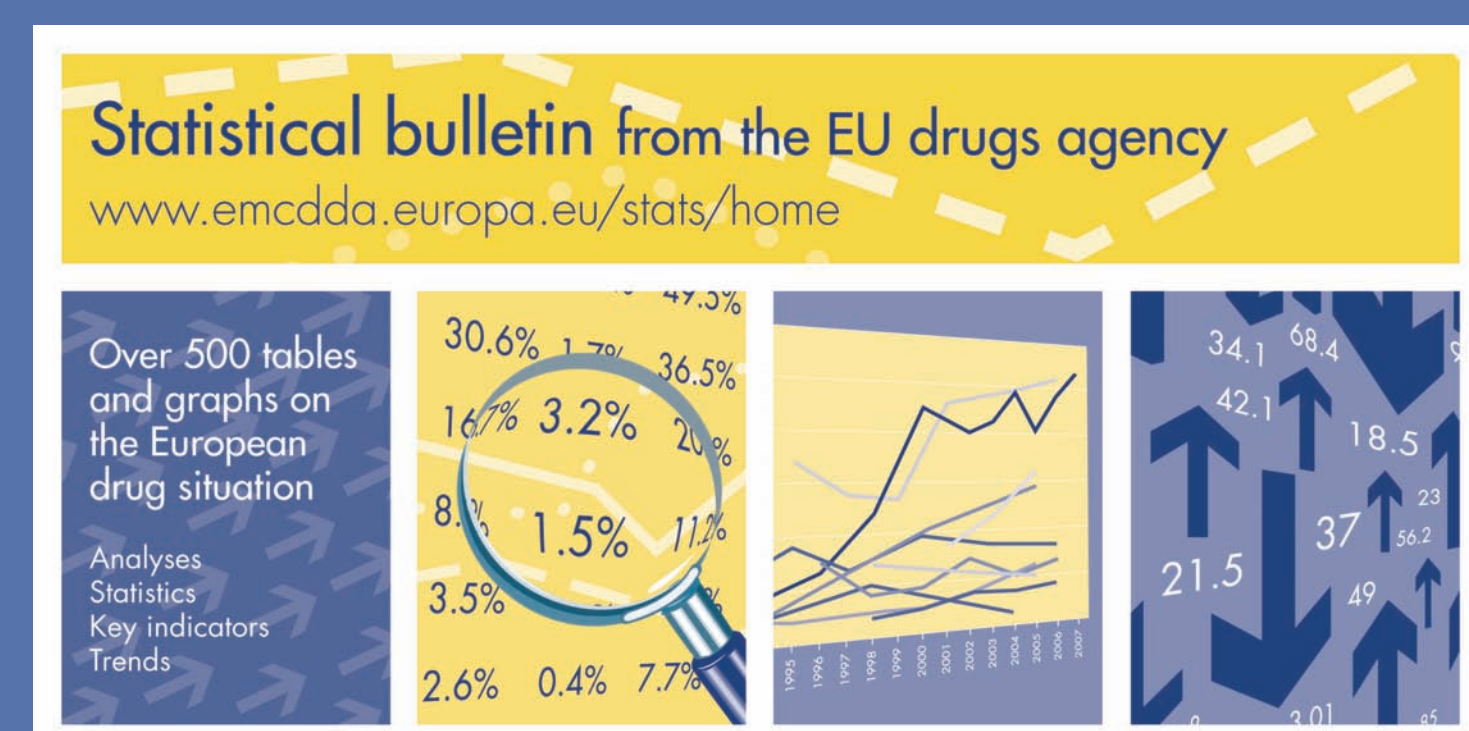

## More than just a report

The *Annual report* is part of an extensive information package offering in-depth analysis across Europe and by country. This package includes:

### Statistical bulletin — in English

<http://www.emcdda.europa.eu/stats/home>

Over 500 tables and graphs on the European drug situation

Analyses — Statistics — Key indicators — Trends

### Country overviews — in English + national language(s)

<http://www.emcdda.europa.eu/publications/country-overviews>

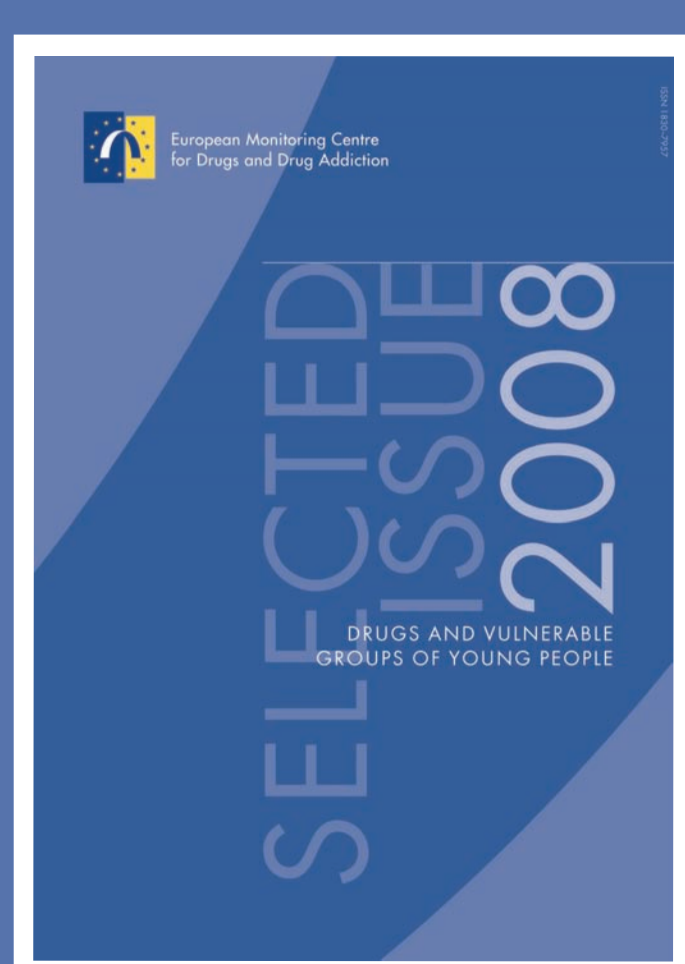

Over 30 national drug situations at a glance

Synopses — Trends — Key statistics — Country rankings

### Selected issues — in English + summaries in 23 languages

<http://www.emcdda.europa.eu/publications/selected-issues>

Reviews of topical interest based on information by a network of national focal points (Reitox)

- vulnerable groups of young people
- research
- public expenditure
