

European Drug Report 2014: Trends and developments

EMCDDA, Lisbon, May 2014

Summary

How many new drugs were detected in Europe over the last year? Is cannabis getting stronger? How many Europeans have ever used an illicit drug? What are the latest drug policy developments in the region? These are just some of the questions explored in the *European Drug Report: Trends and developments*. This report provides a top-level overview of the long-term drug-related trends and developments at European level, while homing in on emerging problems in specific countries. Such a perspective is valuable, as it allows differing national experiences to be understood within the broader European context.
