

Cannabis production and markets in Europe

EMCDDA, Lisbon, June 2012

Summary

This study brings together available evidence to provide a comprehensive analysis of cannabis production and markets across the EU. It combines information from EMCDDA routine reporting ? data on patterns of prevalence and use, seizures, police reports, drug-law offences, cannabis potency and retail market prices ? with literature on cannabis markets to create an in-depth analysis of the issue in a European context.
