# HAV in the Czech Republic Region „CASE KLAŠTER“

Barbara Janikova

National Monitoring Centre for Drugs and Addiction

## HAV situation in Cheb region

- outbreak from 2014, it culminated in 2015  
in 2016 last weeks, there were less cases  
from 2014 when the epidemic situation has started, till  
the end of April 2016 there were in total **339 cases**
- out of which 114 (33,6%) with the drug use in  
anamnesis
- and 35 cases were people without stable housing
- more than half were men (54,0%)

# Interventions

- **shoping malls**
- **schools**
- **low-threshold centres**
- **vaccination**
